- 

### **Super Admin**

- ⑩ Super admin console can be accessed, by signing in using the allotted credentials.
- ⑩ Console has below option
  - ✦ Organization
    - Organization – a company that uses RevenuIntel
    - When a company starts using RevenuIntel, their details such as Organization name, address, primary contact number, email id, and address are added here
    - These details can be used for billing purpose.
    - Client Admin can update/change these details by accessing admin console options.

## Company Information

This information will be used as a default where needed. If you're looking to update your company information for billing, visit [Account & Billing](#).

Company name

Company domain

Company address

Company address line 2

City

State

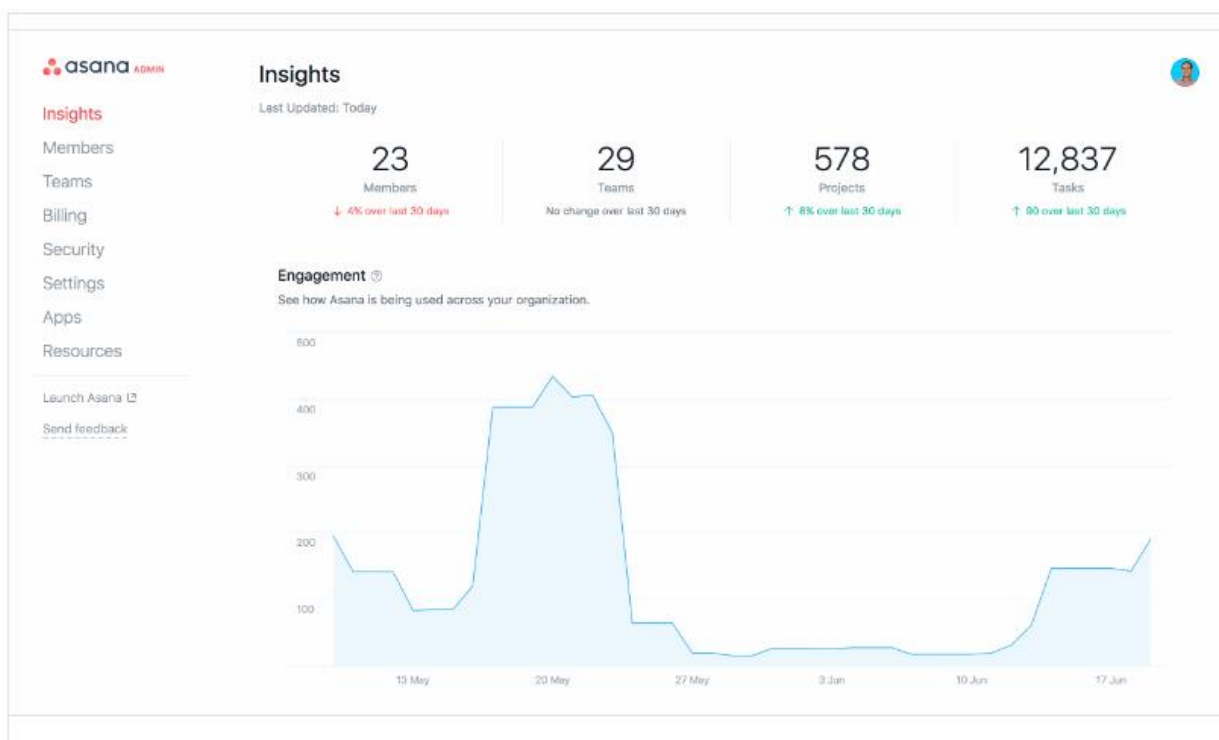

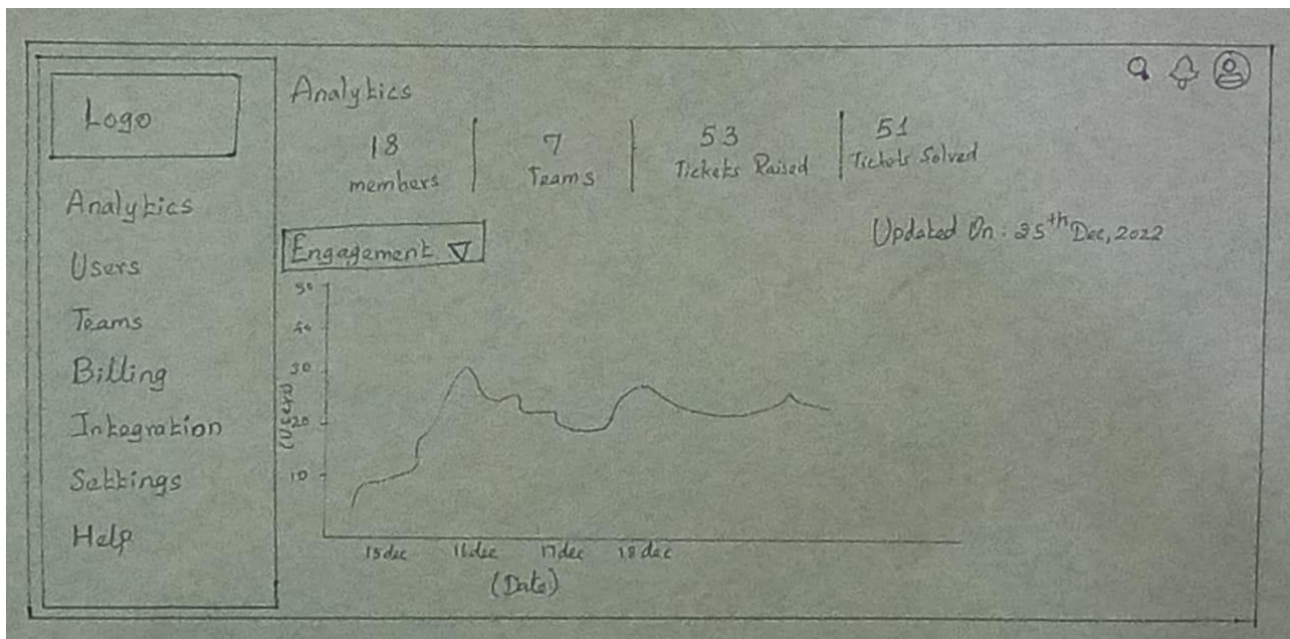

Zip

Country

- Once added, it will be displayed in a list view
- ⑩ Ticket Management
  - Freshdesk – A third party ticketing tool is integrated with RevenuIntel for addressing all user queries and issues.
  - In the organization list view, at the end of each row will have option to access the tickets raised individually by each organization.
  - Status of the tickets will be tracked and the churn rate will be displayed in admin console Analytics tab.
- ⑩ Billing
  - Stripe payment gateway integration
  - Create, edit and update plan details
  - Invoice generation and history of invoice will be maintained here for each organization.
  - Automated reminder settings for invoice notification will be displayed here and in primary account holder's notifications.

## **Admin Console**

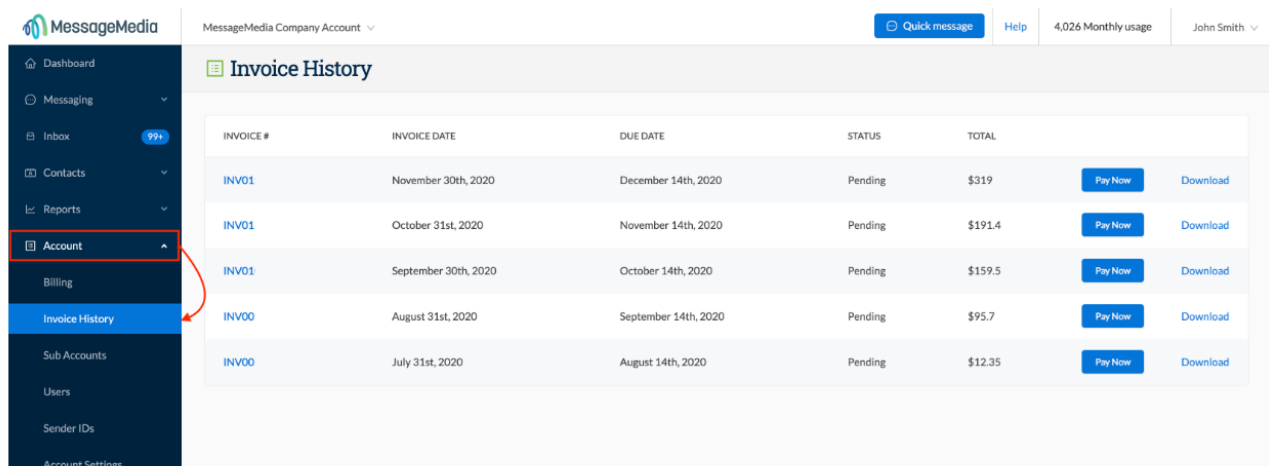

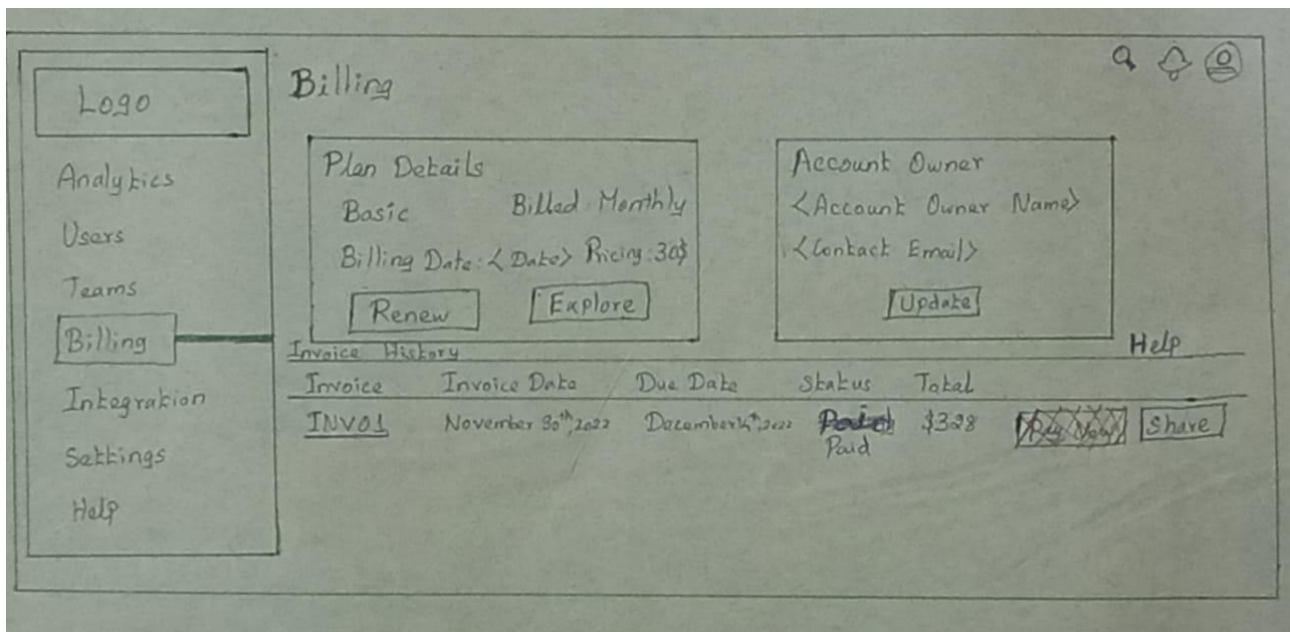

### **Analytics**

- ⑩ This tab gives the overview of how an organization uses RevenuIntel.
- ⑩ Top of the page has the four sections. Total number of users currently using the product, Number of teams created, Number of tickets raised by the Client to super admin, Number of tickets closed by super admin should be displayed.
- ⑩ A area Chart is displayed in the bottom part of the page. This chart is to present the engagement level of users and no.of reports generated in day basis.
- ⑩ A drop down menu should be placed on left corner of the chart with the options Engaement and Reports generated.
  - Engagement – Usage of revenuintel by all users in day basis
  - Reports Generated – No.of reports generated by all users in day basis.

## **Billing**

10 Billing tab has three components.

- **Current Plan** – this component displays the details of the chosen current plan with plan name and billing period.
- Two options are provided to RENEW the current plan and to CHANGE PLAN.
- RENEW – If renew is selected, page redirects to checkout process and payment gateway.
- CHANGE PLAN – If change plan is selected, page redirects to different plan available to choose.
- **Account Owner** – Primary contact person name and contact details such as email and contact number will be displayed here.
- Above said details can be edited through update button in the component.
- Account owner may or may not be an admin.
- **Invoice History** – this table has the following fields. Invoice (Invoice number), Invoice Date, Due Date, Status (Paid/Pending), Total (amount to be paid)
- In table, Invoice (Invoice number) should be a clickable link. Once clicked it should prompt to open that invoice as popup.
- Each row of the table has SHARE option to share that particular invoice through mail as an attachment in PDF format.

- **Help** – Help option is provided to raise ticket for query to be raised at the top corner of the table. Once clicked, it should redirect to the ticketing page.
- 

### **Integration**

Purpose of this tab is to maintain the history of the third party applications (Ex: CRM, Automation applications) integrated with RevenuIntel to retrieve input data.

Its a list view table with fields such as Application name, Integrated on (Date), Status (Active/Inactive), active till (Date).

<div>Logo</div> <div>Analytics</div> <div>Users</div> <div>Teams</div> <div>Billing</div> <div>Integration</div> <div>Settings</div> <div>Help</div>	<div>Integration</div> <div> <div>Application Name</div> <div>Integrated On</div> <div>Status (Last active)</div> </div> <div> <div>Freshdesk Sales Suite</div> <div>13/12/2022</div> <div>Active, 27/12/2022</div> </div> <div> <div>Freshworks Sales Hub</div> <div>07/05/2022</div> <div>Inactive, 12/12/2022</div> </div>
--	---

## Settings

This Settings tab provides security settings, Privacy & Consent settings for the Organization. Admin can change/ update the settings for all the users under their organization.

### Security Settings

General

Security

Branding

User Defaults

Currency

These defaults will be applied to the entire account. To manage your personal security settings, go to [security preferences](#).

## Login

### Set up single sign-on

When this is set up all users can log in using company credentials.

☐

### Require Two-Factor Authentication (2FA)

When this is selected all users are required to use 2FA to log in.

## Activity Logs

### View account login history

Inspect history of login activity in your HubSpot account from the last year.

### View security activity history

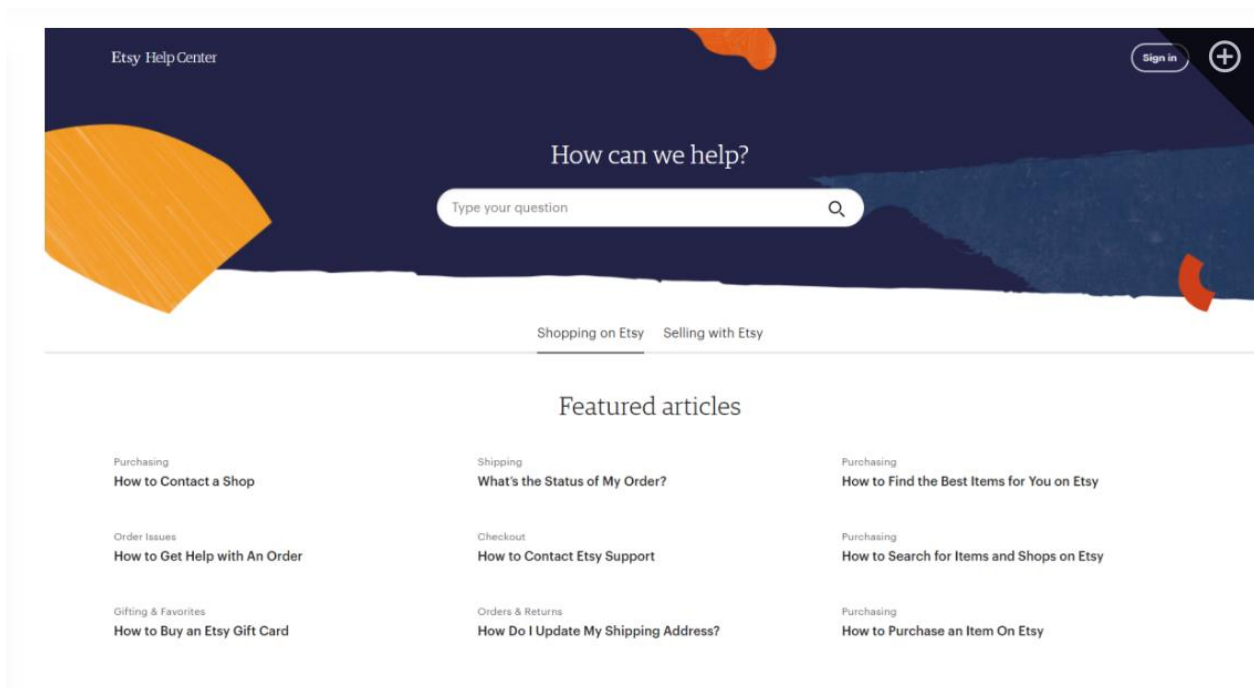

Review insights into notable security actions taken in your HubSpot account in the last year.

## Options to be included:

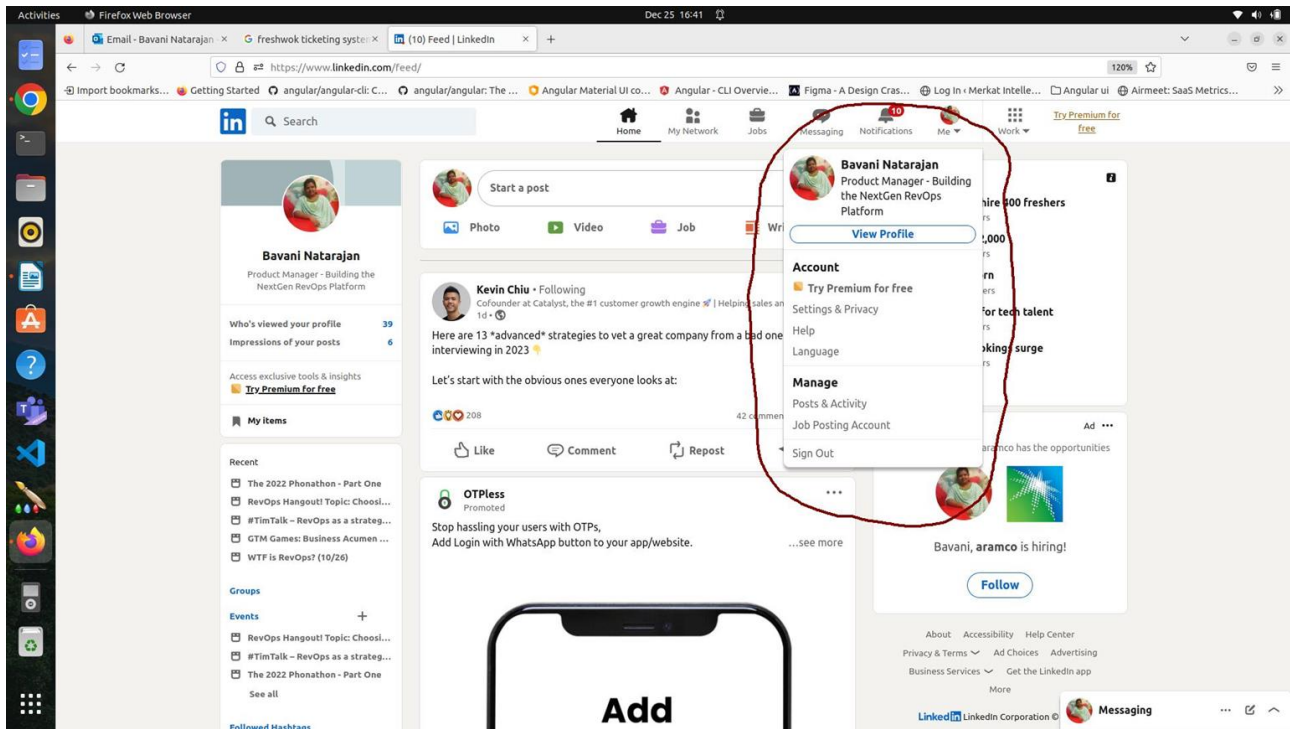

- (1) Single sign-on set up
- (2) Enabling two factor authentication for all users
- (3) View Account login history
- (4) Security activity history done by super admin

## Help

- ⑩ This help section provides the FAQs and related articles for all admin activities.
- ⑩ *Help section in admin console is only for admin activities, whereas the help section in User menu is for overall product help. Both serve different purposes and the content will be different in both.*

**User Menu – (For all users except Account Owner)**

- ⑩ Purpose of this user menu is to access individual user's general settings, Ticket assistance, Help section and logout.
- ⑩ This menu can be accessed in the SMART dashboard by clicking the display picture of the user.

## Menu Options

### (1) Settings

- ⑩ When the user clicks on settings, screen redirects to user profile's general settings and security settings.
- ⑩ General settings – User First name, Last Name, Designation, email, contact no and product role are displayed

[Remove me from this account](#)

- ⑩ Security settings – Multi factor authentication (MFA) options are provided.
- ⑩ MFA options are Temporary password, Help question and answers, Random picture and word selection. Users can select anyone of the above as per their preference.
- ⑩ **Temporary password is set default for all the users**, they can change this options by accessing this section of the menu

### (2) Ticket Assistance

- ⑩ When the user is facing an issue or to communicate with the super admin regarding any questions they have, a ticket will be raised by accessing this option.

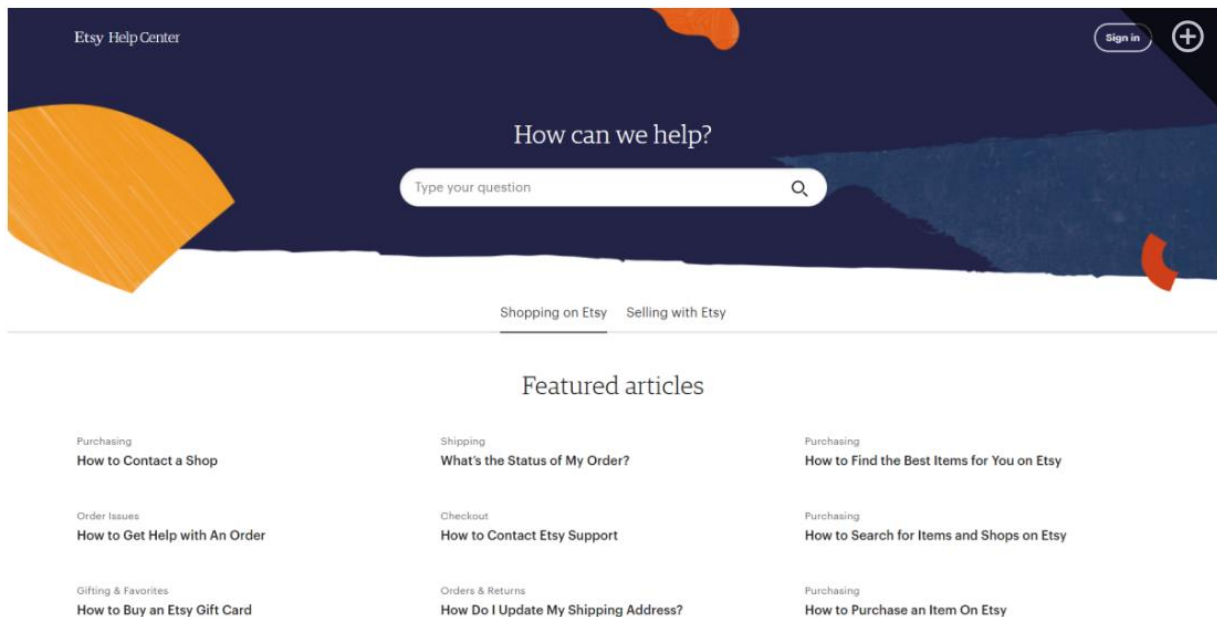

- ⑩ User can see and track the status of their tickets too
- ⑩ A third party ticketing tool is integrated with RevenuIntel to serve this purpose.

### (3) Help

- ⑩ Help section consists of FAQs on RevenuIntel and related articles to go through to answer all the queries user might have.
- ⑩ If they wanna contact Super admin, can do it by raising a ticket by clicking the ticket assistance tab.

Note:

- ⑩ ***Help section in User menu is for overall product, whereas the Help section in admin console is only for admin activities Both serve different purposes and the content will be different in both.***

#### (4) Logout

- ⑩ When the user clicks log out option, a popup window appears with the question, “Do you want to Log Out?”
- ⑩ By clicking Yes, user gets logged out. By clicking No, user continues to access RevenuIntel.

#### **User Menu – For Account Owner**

- ⑩ For Account Owner the user menu should have **Billing & Preferences** with all the above mentioned option.
- ⑩ Only Account owner & Admin has access to Billing page.
- ⑩ By Clicking Billing & Preferences, Billing page in admin console alone should be displayed. Other navigation options in admin console should not be displayed.
